

Textbook Information

General Information

Pacific Rim Early Childhood Institute uses both hard copy textbooks and online resources in the course materials. Please ensure you have purchased the required textbook prior to enrolling in the associated course. Double check you have the correct title, author and edition.

Required textbooks may be purchased from any source. For convenience there are direct links to most of the textbooks on [our website](#). Many of the textbooks are available as eBooks for purchase or rental from services such as VitalSource.

If the textbook edition listed is not available please order a more recent edition. The total cost for new textbooks for the Basic ECE Certificate program is approximately \$970. The total cost for new textbooks for both the post-basic ITE and SNE Certificate programs is approximately \$1080. Students may be able to find suitable used textbooks. For students living outside BC, there may be an additional cost to subscribe to the Science of Early Childhood Development “living textbooks” required for some of the courses. The 2-year subscription is approximately the cost of a single textbook and the resource can be used for many courses over the subscription period.

Science of Early Childhood and Development Resource Information

Many Pacific Rim Early Childhood Institute course materials require access to the Science of Early Childhood Development “North American Edition” and/or the “Child Development Primer”. These resources are considered “living textbooks” which are prepared and updated frequently by Canadian Early Childhood experts. If one or both of these resources is required for a course, they will be listed in the “Required Textbook” section below along with other required textbooks.

For students living in British Columbia until April 1, 2024

The Ministry of Education and Childcare is paying for open access (essentially a free subscription) until April 1, 2024. Until then, the SECD “living textbooks” are free without a subscription for students accessing the [SECD website](#) from within the borders of British Columbia. Students within the borders of BC, may simply click on the links provided within course materials and they will be directed to the correct website as long as their Internet Browser’s “Location Services” is turned on. [Frequently asked questions](#) about geolocation and use of this resource, including on [how to handle references](#) to the SECD materials can be found on their website.

For students living outside British Columbia and British Columbians after April 1, 2024

Students accessing the materials outside the province of British Columbia, and all students after April 1, 2024, access SECD resources for one or both of the “North American Edition” and the “Child Development Primer” depending on which course(s) they are planning to enroll, through purchase or subscription. Access to both SECD resources can be obtained through purchase of a “Single User License + Primer” on the [SECD Website](#). The cost for both sections is comparable to the cost of a textbook. The Primer section is discounted when purchased at the same time as the North American Edition, so if any of the courses you plan on taking requires the primer (which is most of them), it may be prudent to purchase them both together. Use the list below to determine what you will require.

Students should only purchase a subscription if they are not living within the province of British Columbia, and should only purchase the “living textbook(s)” that are required for the course(s) they are planning to enroll in during the 2-year subscription period.

Required Textbooks

Basic Program

Early Childhood Educator Certificate

Health, Safety and Nutrition

Marotz, L. R. (2024). *Health, safety, and nutrition for the young child* (11th ed.). Cengage. ISBN: 9780357765760
